Providence Journal Company
Providence, Rhode Island.

Dear Sir:

I have just returned from Washington, where a close relative of mine, is confined ~~the~~ at the Clinical Center, of The National Institutes of Health. In talking with the Doctors at the Center, I was amazed to find, that the National Institutes of Health is the realized dream and ambition of our own Congressman John E. Fogarty.

To have anyone close to you confined in such a beautiful establishment, and receiving the excellent care that he is receiving makes the Tax Dollar paid by the people of the country, alot easier to take.

I had occasion to call upon Mr. Fogarty, to render a service, in connection with the person confined, and in true Rhode Island spirit, Mr. Fogarty put himself to a great expense of time, and effort, to make things easier for the patient, and we were certainly appreciative for all that he did.

Send file

In the matter of Health of all peoples, regardless of race, creed, or relection, I have found through personal experience, that Mr. Fogarty knows no political party, nor does he play petty politics with the Health and Welfare of the country.

God Bless John E. Fogarty, and may The Good Lord give him the necessary health and strength to continue his fight on the floor of the Congress of the United States for better health for all of the peoples of the country, and in this vain, he has proven, that he knows no boundries. Congress and Rhode Island certainly need more men of Congressman Fogarty's calibre.

Sincerely,
William R. Dodd
William R. Dodd

P.S. John, I sent an exact copy to the Journal on this date. Thanks again, very much.

-Bill-
